

# 1.Executive Summary

[

# 1.Method

## Diary Study

- 3 participants
- 10 weekdays

## Participants

- 18-25 Females
- Commuting Toronto

# 2. Findings

## Persona

- Student
- Commute downtown
- 3-4 times a week
- Bus and 2 Subway

## Feels unsafe when

- Alerts
- Stares from man
- Over crowdedness
- Suspicious People

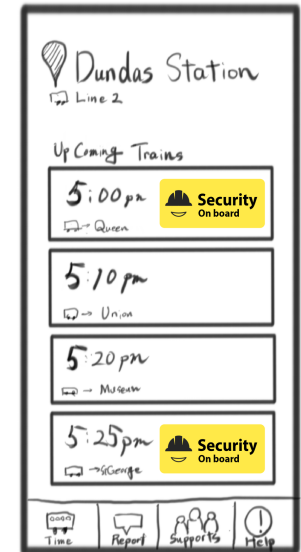

## Pain points

Can't take control of her safety situation except leaving the transit

# 3.Recommendation

## Security on board transit

- Security on board train
- App notifies the time

## 2. Research Introduction [

## 2. Research Introduction

Purpose

Observing user's journey and find opportunity to support with new app

Searching for...

1 Hidden pain points

2 Users behavior

- Contexts, scenes, tasks
- Reactions to events
- Precautions

## 2. Research Introduction

### Hypothesis

Young people, especially female are often experience unsafe situation over the course of travel

### Research Questions

When and where do users feel unsafe?

How do they react to the safety events?

How can users avoid the troubles with an app?

How can users feel safer?

### 3. Method

[

### 3. Method

## Diary study

#### Period

10days

6 Mar – 17 Mar (No weekend)

#### Participants

Behavior: GTA commuting who have felt unsafe

Age 18-25 years old

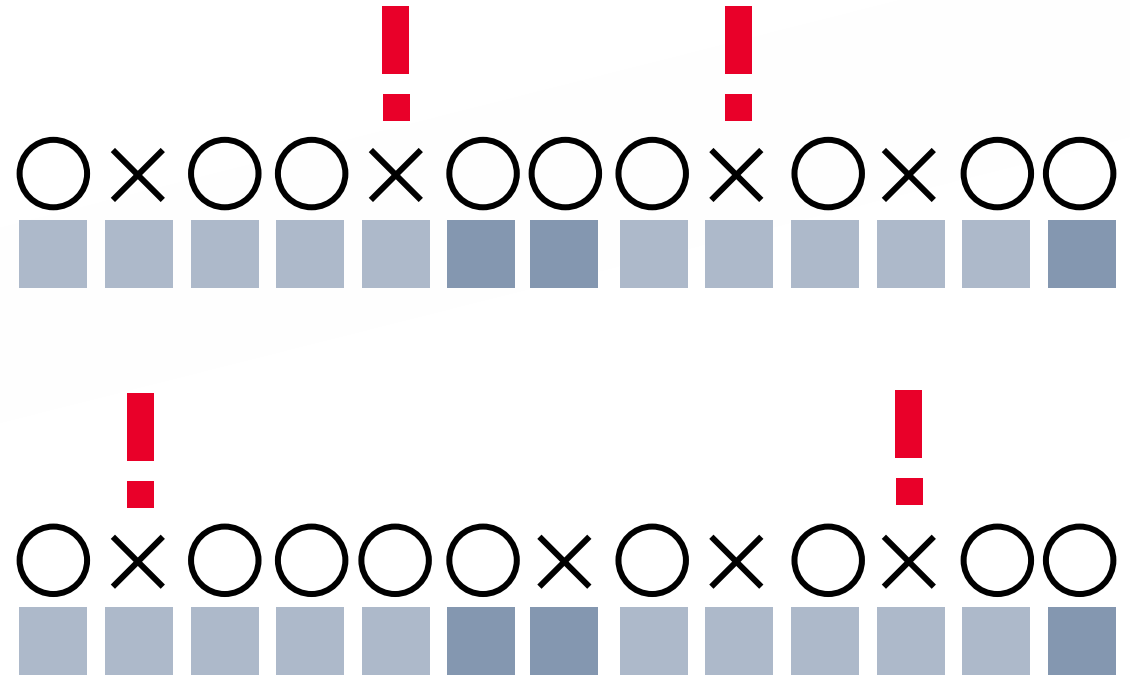

Gender : woman

Number of Participants : 3

#### Delivery

Sending Google Form through social media

At every 6pm

### 3. Method

#### Ethics

- All participants signed up consent form
- Personal information kept confidential
- Data disposal after all projects
- Secure administration of data

#### Timeline

##### Week 1

- Plan
- Recruit

##### Week 2

- Prepare
- Refine Questions

##### Week 3, 4

- Deliver
- Analyze

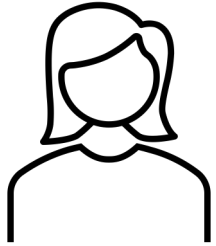

##### Week 5

- Report

## 4. Findings/Recommendation [

## 4. Findings - Persona

**Kate Smith (19)**

TMU student

### Demographic

- 19 years old
- Female
- Lives in Kipling-Eglington with her family
- Student of TMU business course

### The use of public transit

- Uses **bus and subway**
- Commutes to TMU **three times a week**
- Go out with her friends to downtown on Friday night

### Goal

- Travel to destination without feeling unsafe
- Travel to destination with no stress
- Safely get out of unsafe situations

### Pain Points

- She **can't take control** of her safety situation except leaving the transit
- She wants to **avoid confrontation** with suspicious person

4. Findings - Persona

House

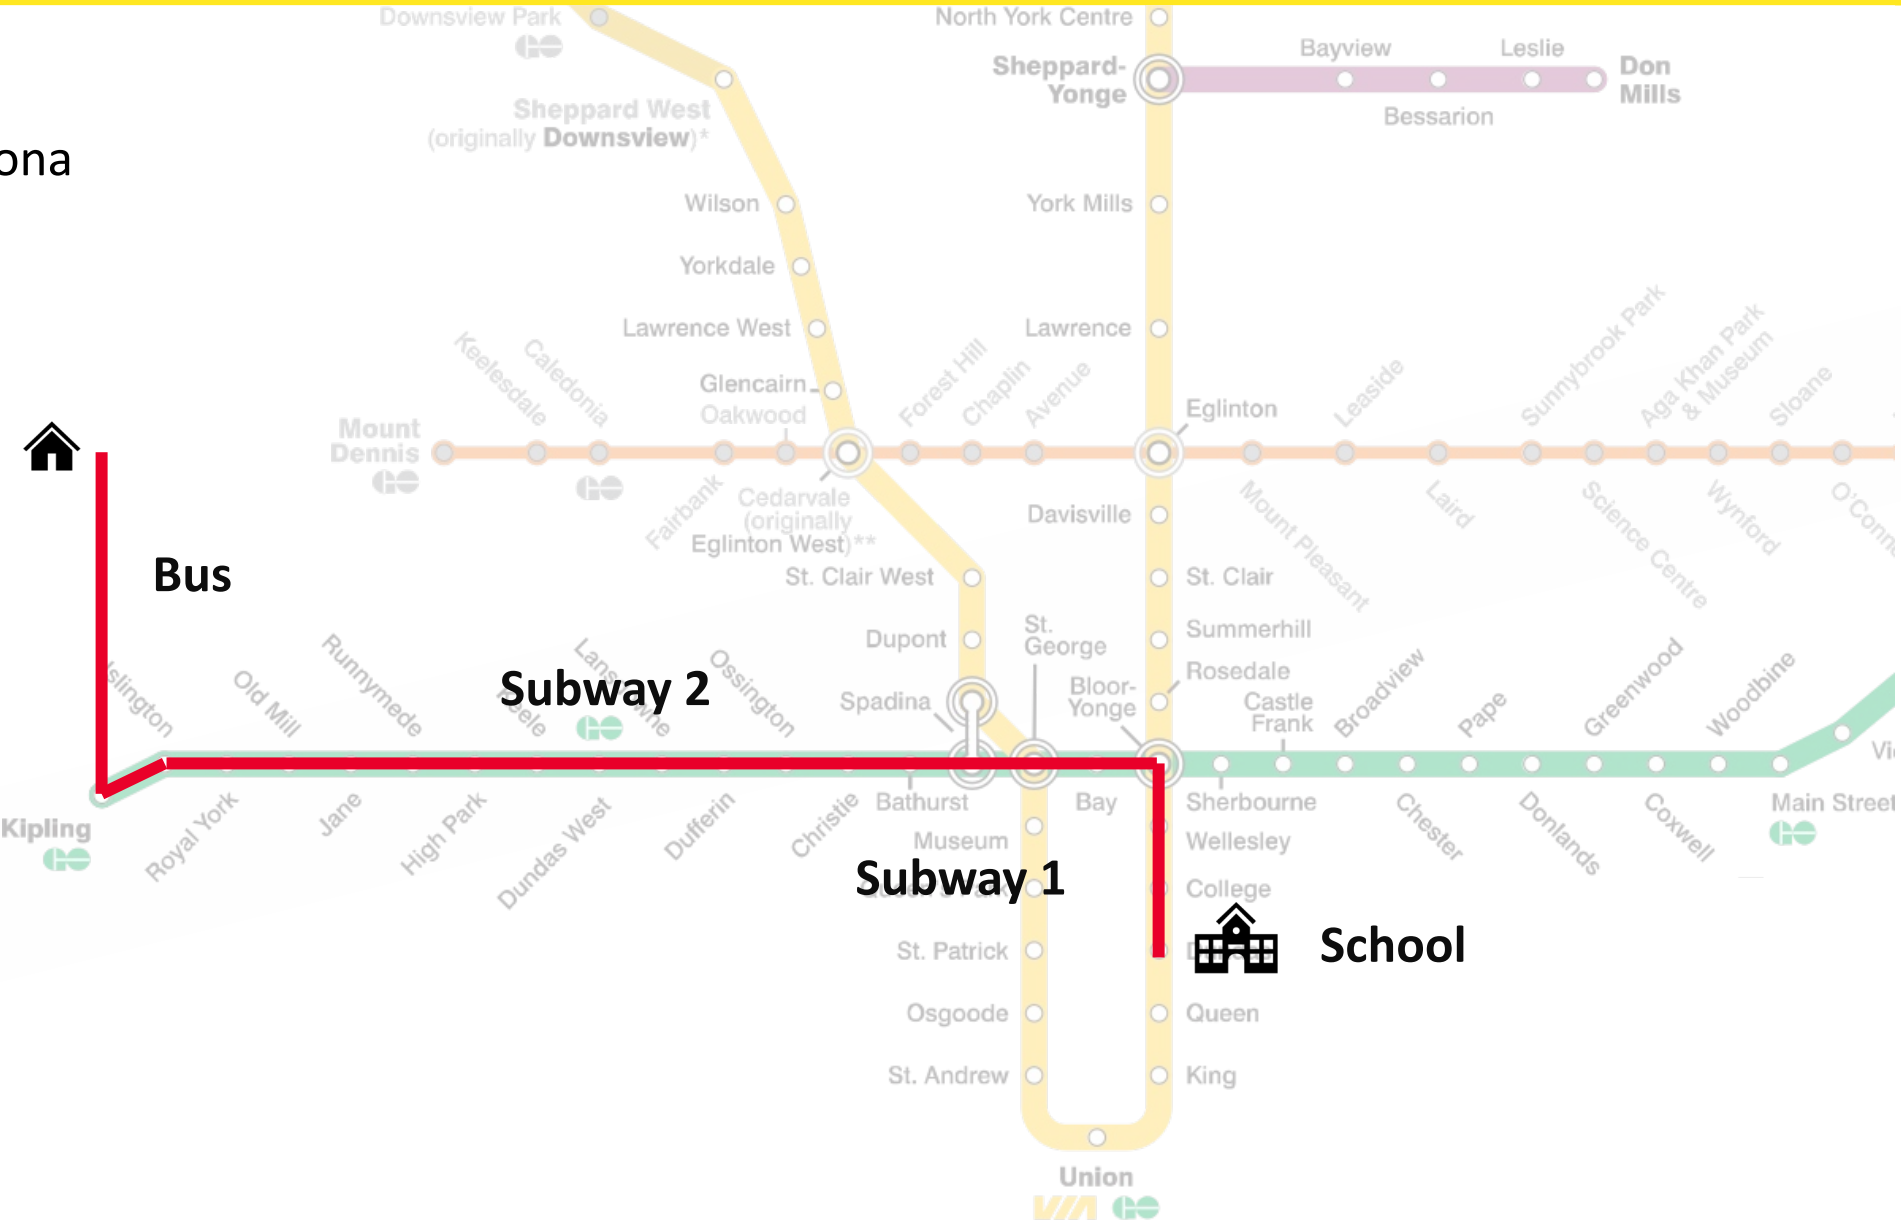

Bus

Subway 2

Subway 1

School

## 4. Findings - Journey Map

| Date             | Monday                                                                                                                                                                                                                                                                                                                      | Tuesday                                                     | Wednesday                                                                                                                                                                                        | Thursday                                                                                                                                                                                | Friday                                                                                                                                                                                                                           |

## 5. Conclusions

[

## 5. Conclusion

### Summary

The app should enable users to **choose safer trip** so that users can somewhat **take control of their safety**.

### Next Steps

- Create scope table
- Sketch and wireframe
- Test the minimal prototype
